

Bertec® Pull-cord E-Stop

Take safety one step further with Bertec's Pull-cord E-stop accessory for the Bertec Fully Instrumented Treadmill (FIT5). Mounting directly onto the handrail, this e-stop clips onto the participant and will automatically stop the treadmill belts when the clip is pulled out of the device. This familiar safety enhancement functions like most commercial gym treadmill e-stops and reduces reliance on the researcher to stop the treadmill manually.
